*For the Nine Months & Quarter ended 31 March 2020***Dear Shareholders,**

The Directors of Synthetic Products Enterprises Limited are pleased to present your Company's condensed interim financial information for the nine months and quarter ended 31 March 2020 along with the Directors' review thereon.

**Financial Analysis**

	Nine Months Ended		Quarter Ended	
	31 Mar 2020 PKR Millions	31 Mar 2019 PKR Millions	31 Mar 2020 PKR Millions	31 Mar 2019 PKR Millions

Cost of Sales	(2,001.33)	(1,909.05)	(654.12)	(613.51)
Gross Profit	439.83	382.70	167.05	127.51
Operating Profit	299.83	243.59	122.46	80.81

The revenue for the nine months period under review has increased by 6.5% as compared to same period of last year. The gross profit ratio and operating profit ratio is increased to 18% and 12% respectively despite the macro-economic challenges arising in the country, inflationary pressures and rising cost of doing business.

The other income has increased mainly due to unwinding of financial cost on long term receivable from our customers. The company will recognize the remaining portion on periodic basis under the head of 'other income' till June 2021 being the maturity date of long term receivable.

Through Finance Act 2019, the government has abolished the benefit of tax credit for making investment in balancing, modernization, replacement and expansion under section 65(B) of the Income Tax Ordinance, 2001 due to which the tax expense has grown up as compared to the tax expense of comparative period.

**Outlook**

Due to outbreak of COVID-19, the economic environment is effected, the company is working to cope with the challenges arising due to this pandemic by enhancing focus on the less-effected sectors and by developing new products to fulfill the future requirements of the economy.

SPEL remain committed to supply quality products and to deliver on time to its customers as it is our promise of reliability.

**Acknowledgement**

We would like to thank our valued customers for their confidence and trust in the Company's products. We are also thankful to all other stakeholders including dealers, suppliers, bankers, shareholders and employees for providing continuous support.

## **4 Significant accounting policies**

4.1 The accounting policies adopted for the preparation of the financial statements are the same as those applied in the preparation of the financial statements of the Company for the year ended 30 June 2019, except for those disclosed in note 4.2 of these condensed interim financial statements.

### **4.2 Changes in significant accounting policies**

The Company has adopted IFRS 16 'Leases' from 01 July 2019. The impact of adoption of IFRS 16 has been explained below.

#### **4.2.1 IFRS 16 - Leases**

IFRS 16 introduces a single, on-balance sheet lease accounting model for lessees. A lessee recognizes a right-of-use asset representing its right to use the underlying asset and a lease liability representing its obligation to make lease payments. As a result, the Company, as a lessee, has recognized right of use of assets representing its right to use the underlying assets and lease liabilities representing its obligation to make lease payments. There are recognition exemptions for short-term leases and leases of low-value items. Lessor accounting remains similar to the current standard i.e. lessors continue to classify leases as finance or operating leases.

The Company has applied IFRS 16 using the modified retrospective approach as at 01 July 2019. Accordingly, the comparative information presented has not been generally restated -i.e. it is presented, as previously reported, under IAS 17 and related interpretations. The details of changes in accounting policies are disclosed below.

### As a lessee

As a lessee, the Company previously classified leases as operating or finance leases based on its assessment of whether the lease transferred substantially all of the risks and rewards of ownership. Under IFRS 16, a contract is, or contains, a lease if the contract conveys a right to control the use of an identified asset for a period of time in exchange for consideration. The Company now recognizes right of use assets and lease liabilities for material leases i.e. these leases are on balance sheet.

The Company presents right-of-use assets as a separate line item on face of balance sheet under Non Current Assets with the same classification of underlying assets of the same nature that it owns.

The Company recognizes a right of use asset and a lease liability at the lease commencement date. The right of use asset is initially measured at cost which comprise the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and subsequently at cost less accumulated depreciation and impairment losses, and adjusted for certain re-measurements of the lease liability. The right to use asset is subsequently depreciated using the straight line method from the commencement date to the earlier of the end of useful life of the right of use asset or the end of the lease term. The estimated useful lives of right of use asset are determined on the same as those of property, plant and equipment. In addition, the right of use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The Company has applied judgment to determine the lease term for lease contracts in which it is a lessee that include renewal options. The assessment of whether the Company is reasonably certain to exercise such options impacts the lease term, which significantly affects the amount of lease liabilities and right-of-use assets recognized.

### Transition

On transition to IFRS 16, the Company elected to apply the practical expedient to grandfather the assessment of which transactions are leases. The Company applied IFRS 16 only to contracts that were previously identified as leases. Contracts that were not identified as leases under IAS 17 and IFRIC 4 were not reassessed for whether there is a lease under IFRS 16. Therefore, the definition of a lease under IFRS 16 was applied only to contracts entered into or changed on or after 01 July 2019, if any.

Previously, the Company classified property leases as operating leases under IAS 17. These mainly include leasehold land obtained and certain warehouses. Some of the lease includes an option to renew the lease for an additional period after the end of the contracted period.

At transition, for lease classified as operating lease under IAS 17, lease liability was measured at the present value of the remaining lease payments, discounted at the Company's incremental borrowing rate. Right of use asset is measured at an amount equal to the lease liability adjusted by the amount of any prepaid or accrued lease payments if any. The Company has not recognized any additional right of use asset or corresponding lease liability since the impact was immaterial. However, leasehold land and leased vehicles presented in property, plant and equipment are now being presented as right of use assets with in property, plant and equipment

The Company used the following practical expedients when applying IFRS 16 to leases previously classified as operating leases under IAS 17.

- Used hindsight when determining the lease term if the contract contains options to extend or terminate the lease.
- Did not recognize right of use asset and liabilities for leases of which the lease term ends within 12 months of the date of the initial application.

**4.3 The following International Financial Reporting Standards (IFRS Standards) as notified under the Companies Act, 2017 and the amendments and interpretations thereto will be effective for accounting periods beginning on or after 01 January 2020:**

The following standards, amendments and interpretations of approved accounting standards will be effective for accounting periods beginning on or after 01 January 2020:

- Amendment to IFRS 3 'Business Combinations' – Definition of a Business (effective for business combinations for which the acquisition date is on or after the beginning of annual period beginning on or after 01 January 2020). The IASB has issued amendments aiming to resolve the difficulties that arise when an entity determines whether it has acquired a business or a group of assets. The amendments clarify that to be considered a business, an acquired set of activities and assets must include, at a minimum, an input and a substantive process that together significantly contribute to the ability to create outputs. The amendments include an election to use a concentration test. The standard is effective for transactions in the future and therefore would not have an impact on past financial statements. The amendment is not likely to have an impact on the Company's financial statements.

- Amendments to IAS 1 Presentation of Financial Statements and IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors (effective for annual periods beginning on or after 01 January 2020). The amendments are intended to make the definition of material in IAS 1 easier to understand and are not intended to alter the underlying concept of materiality in IFRS Standards. In addition, the IASB has also issued guidance on how to make materiality judgments when preparing their general purpose financial statements in accordance with IFRS Standards.
- On 29 March 2018, the International Accounting Standards Board (the IASB) has issued a revised Conceptual Framework for Financial Reporting which is applicable immediately contains changes that will set a new direction for IFRS in the future. The Conceptual Framework primarily serves as a tool for the IASB to develop standards and to assist the IFRS Interpretations Committee in interpreting them. It does not override the requirements of individual IFRSs and any inconsistencies with the revised Framework will be subject to the usual due process – this means that the overall impact on standard setting may take some time to crystallize. The companies may use the Framework as a reference for selecting their accounting policies in the absence of specific IFRS requirements. In these cases, companies should review those policies and apply the new guidance retrospectively as of 01 January 2020, unless the new guidance contains specific scope outs.

The above amendments are not likely to have an effect on the Company's financial statements.

The revenue for the nine months period under review has increased by 6.5% as compared to same period of last year. The gross profit ratio and operating profit ratio is increased to 18% and 12% respectively despite the macro-economic challenges arising in the country, inflationary pressures and rising cost of doing business.

The other income has increased mainly due to unwinding of financial cost on long term receivable from our customers. The company will recognize the remaining portion on periodic basis under the head of 'other income' till June 2021 being the maturity date of long term receivable.

Through Finance Act 2019, the government has abolished the benefit of tax credit for making investment in balancing, modernization, replacement and expansion under section 65(B) of the Income Tax Ordinance, 2001 due to which the tax expense has grown up as compared to the tax expense of comparative period.

**Outlook**

Due to outbreak of COVID-19, the economic environment is effected, the company is working to cope with the challenges arising due to this pandemic by enhancing focus on the less-effected sectors and by developing new products to fulfill the future requirements of the economy.

فنانس ایکٹ 2019 کے تحت حکومت نے BMR اور Expansion پر انکم ٹیکس آرڈیننس 2001 کی دفعہ 65(B) کے تحت ٹیکس کریڈٹ ختم کر دیا ہے جس کی وجہ سے ٹیکس خرچ گزشتہ سال کی اسی مدت سے زیادہ ریکارڈ کیا گیا ہے۔
